Managua

Professional Summary

Systems Engineer with over 5 years of experience in web application development, enterprise systems integration, and process optimization. Specialized in .NET, Vue.js, SQL Server, and DevOps, with experience designing APIs, modernizing legacy systems, and integrating enterprise resource planning (ERP) systems. Experienced in providing technical leadership on projects and collaborating with business teams, with a focus on delivering scalable, efficient solutions aligned with business objectives.

PROFESSIONAL EXPERIENCE

SYSTEMS SPECIALIST & DEVELOPER — CAFÉ SOLUBLE S.A. | 2023 – PRESENT

- Provide technical leadership for corporate software development and systems integration projects.
- Develop and optimize enterprise applications using .NET, JavaScript, TypeScript, Vue.js, and Vuetify.
- Modernize and migrate legacy systems to modern web architectures, improving maintainability, performance, and user experience.
- Develop and integrate solutions with Infor LN ERP and the XSales SFA platform.
- Design and generate corporate reports using SQL Server Reporting Services (SSRS).
- Manage source control and development workflows using Git and Azure DevOps.
- Develop and maintain reusable NuGet packages to standardize and optimize internal software components.
- Participate in technical analysis, incident resolution, and continuous improvement of enterprise software processes.

CUSTOMER MANAGEMENT ENGINEER — JUEGAOK S.A. | 2022 – 2023

- Developed business applications using C#, ASP.NET MVC, Web Forms, and Web API.
- Optimized SQL Server processes, improving the performance of critical queries.
- Implemented enhancements and features based on customer requirements.
- Provided production support and troubleshooting.

WEB DEVELOPER — EMPROVISA S.A. | 2020 – 2022

- Developed web applications using C#, Web API, Vue.js, and Vuetify.
- Optimized database processes in SQL Server and Oracle, improving the performance of critical queries.
- Implemented enhancements and features based on customer requirements.

KEY PROJECTS

- Desktop-to-Web Application Migration — Migrated legacy desktop applications to modern web-based architectures, improving maintainability, accessibility, and scalability.
- Infor LN ERP Integrations — Developed APIs, automations, and custom solutions to integrate corporate systems with Infor LN ERP and optimize business processes.
- SFA XSales SaaS Migration — Integrated the XSales sales platform with Infor LN ERP to enable data synchronization and operational automation.
- Centralized JWT Authentication System — Implemented a centralized authentication and access control solution for multiple corporate portals using JWT-based authentication.
- AI Agent with OpenAI SDK — Developed an AI-powered assistant integrated with internal systems to automate processes and provide operational support.

EDUCATION

- BACHELOR'S DEGREE IN SYSTEMS ENGINEERING
National University of Engineering (UNI) — Managua, Nicaragua | 2017 – 2021

LANGUAGES

- Spanish: Native
- English: B1 – Intermediate (Strong reading and technical writing; basic conversational skills)

CERTIFICATIONS & PROFESSIONAL TRAINING

- Artificial Intelligence and Agent Development with .NET — Udemy
- Clean Architecture and DDD with ASP.NET Core 8 — Udemy
- .NET Application Development Path — Platzi
- Web Application Development with ASP.NET Core, SQL Server, and Vue.js — Udemy
- Backend Development with C# and .NET — Platzi
- Git and Version Control — Udemy
- Vue.js — Udemy

TECHNICAL SKILLS

Architecture & Design Patterns

- MVC, Clean Architecture, Domain-Driven Design (DDD), Layered Architecture.

Programming Languages & Technologies

- C#, .NET, T-SQL, JavaScript, TypeScript.

Frameworks & Web Development

- ASP.NET Core, Razor Pages, Vue.js 2/3, Vuetify, jQuery, Bootstrap, HTML5, CSS3.

APIs & Services

- REST APIs con ASP.NET Core, Worker Services, Windows Services, Integración de APIs, Api Gateway YARP , Api Gateway Ocelot, JWT Authentication, Reverse Proxy.

Data Access & ORM

- Entity Framework Core, Dapper, SQL Server, MySQL, Oracle, ETL.

DevOps y CI/CD

- Git, Azure DevOps, Azure Pipelines, Azure Artifacts, despliegue de paquetes NuGet, configuración de Self-Hosted Agents.

AI & Intelligent Systems

- OpenAI SDK, OpenAI API, Large Language Models (LLMs), Prompt Engineering, Embeddings, Retrieval-Augmented Generation (RAG), Vector Stores, AI Agents, AI-powered applications.

Tools & Platforms

- Visual Studio, Visual Studio Code, SSMS, Postman, Swagger, IIS, GitHub, Jaspersoft, SQL Server Reporting Services (SSRS).

Logging y Libraries

- Microsoft ILogger, MediatR.

SOFT SKILLS

- Problem-Solving
- Teamwork & Collaboration
- Adaptability
- Continuous Learning
- Proactive Mindset
